RID05

Product Profile

RID05 is a Super-Mini Android TV Box, small and smart. This streaming Media Player ispowered by Quad core Amlogic S905X Cortex A53, includes a Penta-Core (5-core) GPU thatcan reach speeds of up to 2.0GHz. It comes with Android 6.0 OS, and it provides users a betterexperience to enjoy 4K Ultimate HD vedio. It supports both H.265 and VP9 decoding, which arethe absolute mainstream decoding formats in the glole.
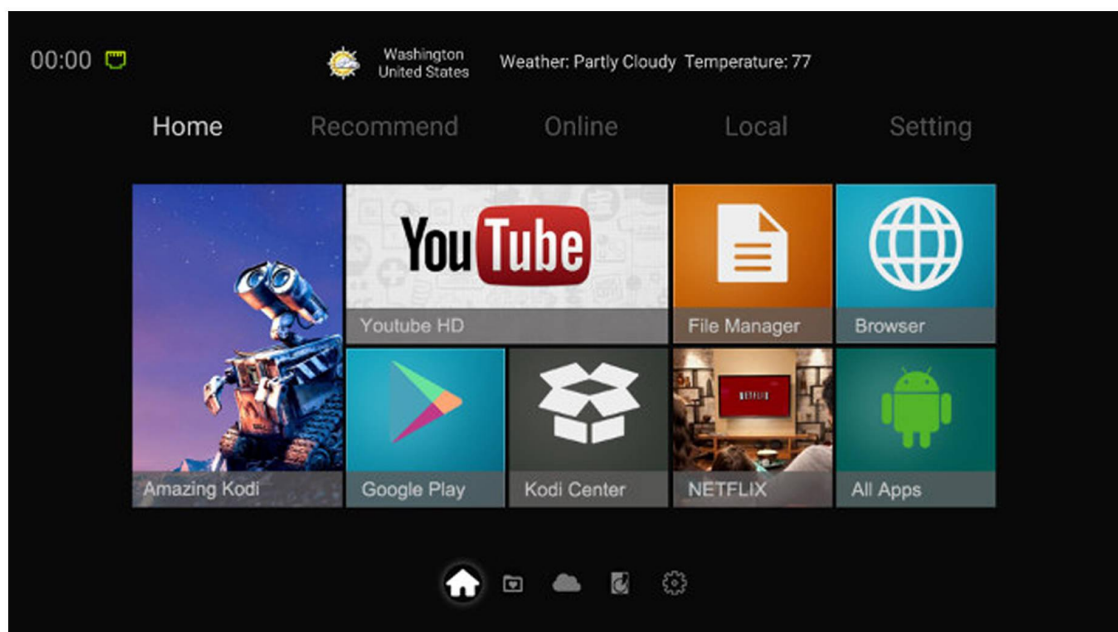

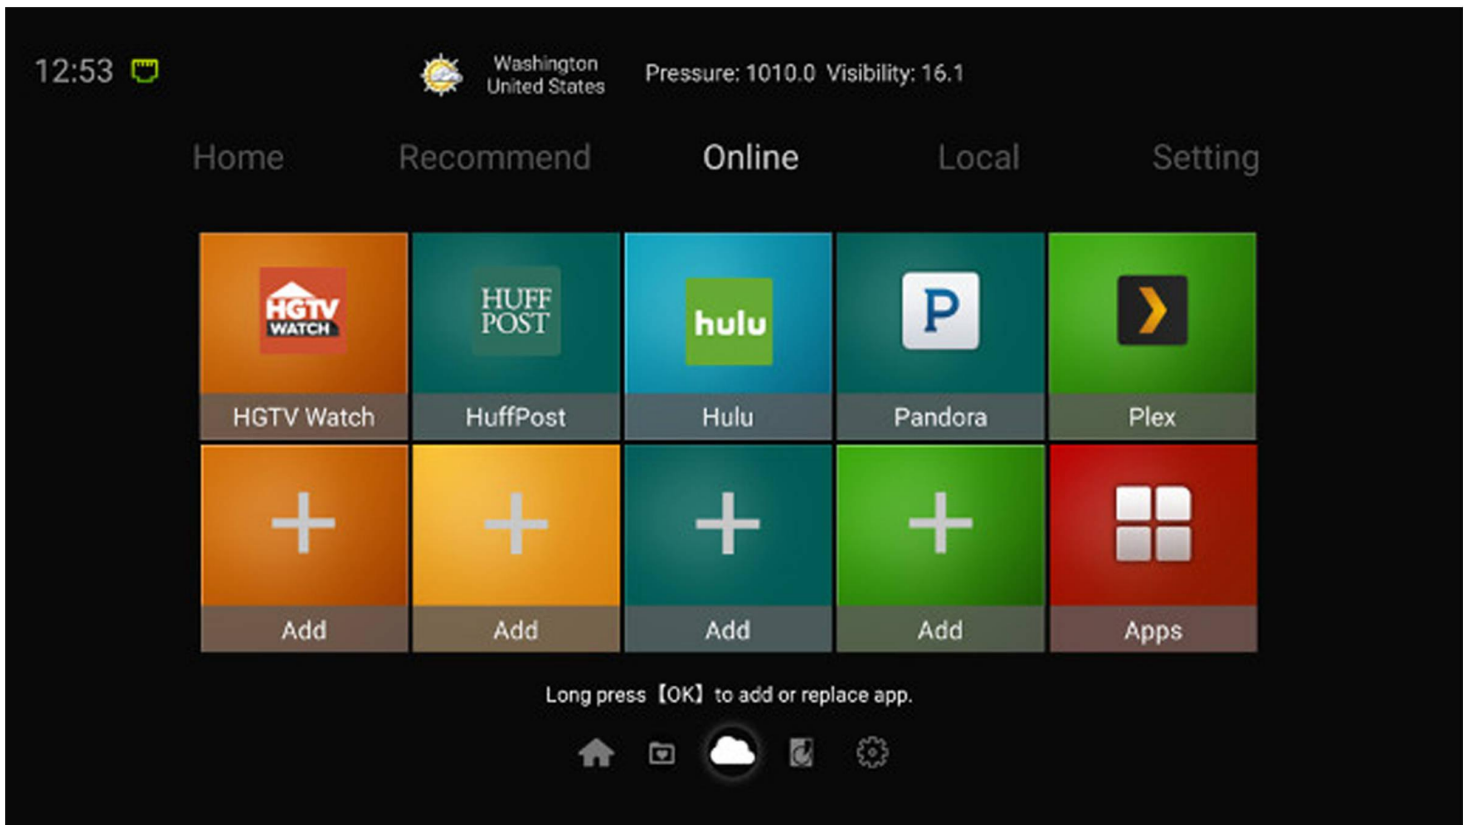

Limitless Entertainment

Free your TV with Limitless Entertainment. All our official Droid Boxes are hassle free, as you simply have to plug them in and play.

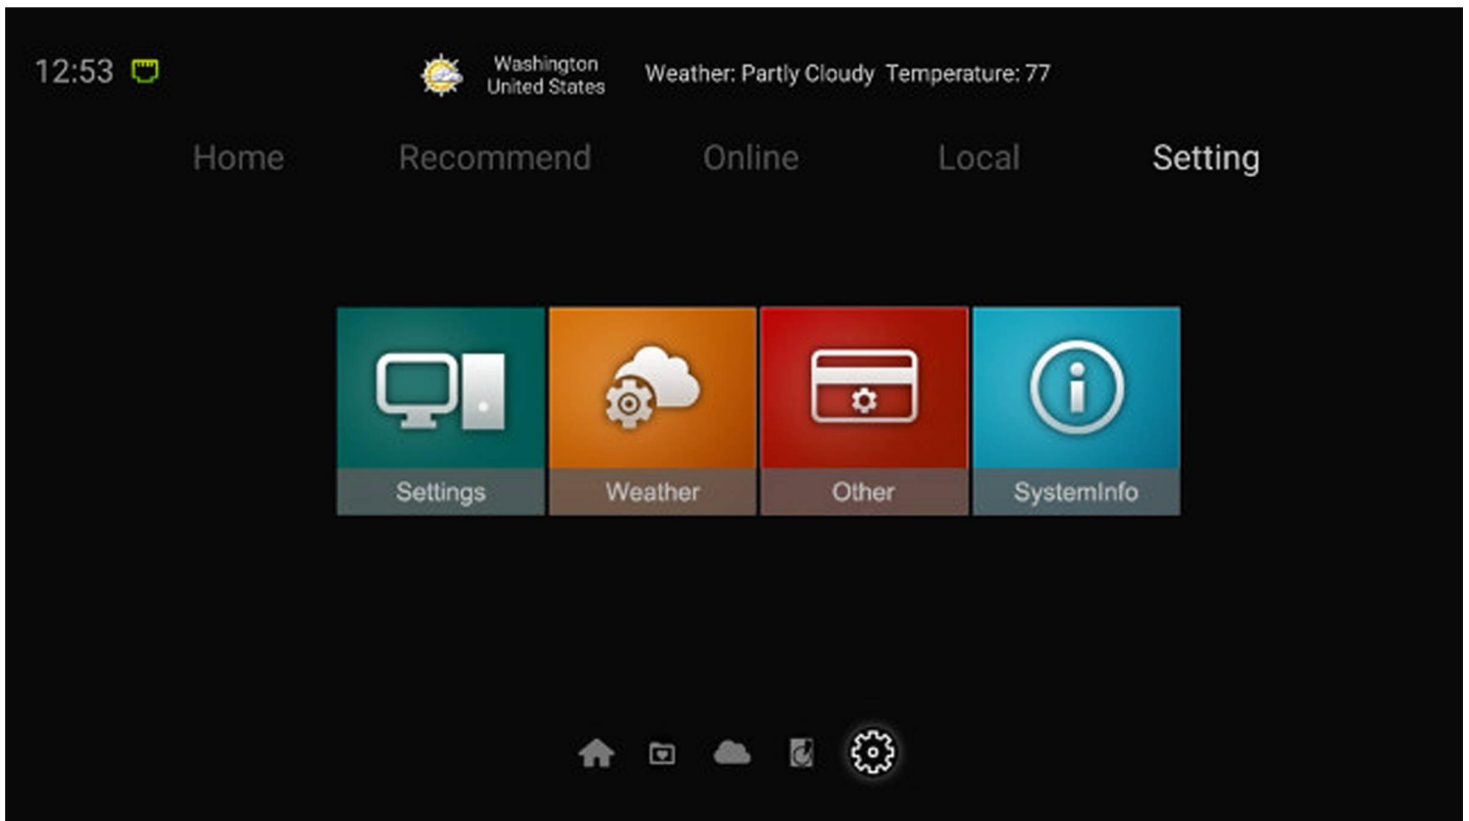

The top row of the user interface shows the current time, network connectivity status, and weather for your selected city. The Home screen has 8 pre-definied (and non customizable) icons for Kodi, YouTube, File Manager, Browser, Google Play, Kodi Center (add-ons installer), Netflix, and a shortcut to All Apps.

The "Recommend", "Online" and "Local" tab are folder where you can add or remove your favorite apps. The Online tab comes with HGTV Watch, HuffPost, Hulu, Pandora, and Plex by default.

SystemInfo will show a summary of the device specifications and firmware, Other will only allow you to disable/enable "touch sounds", Weather is used to set your city, and Settings points to the usual Amlogic settings.
